

Chapters: Introduction to object-oriented programming concepts, Introduction to JAVA, Values and Data Types, Mathematical library Methods, Conditional Constructs in JAVA, Methods

MCQ

Question 1

Procedure Oriented Programming gives importance to

1. Instructions only
2. Instructions and data
3. Data only
4. None of these

Question 2

Procedure Oriented Programming mainly uses

1. Top-down approach
2. Top-down and bottom-up approach
3. Bottom-up approach
4. None of these

Question 3

Object Oriented Programming mainly uses

1. Top-down approach
2. Top-down and bottom-up approach
3. Bottom-up approach
4. None of these

Question 4

An object belonging to a particular class is known as a/an of that class.

1. Interface
2. Instance
3. Alias
4. Member

Question 5

Objects that share the same attributes and behaviour are grouped together into a/an

1. Interface
2. Instance
3. Alias
4. Class

Question 6

..... is the technique of binding both data and functions together to keep them safe from unauthorised access and misuse.

1. Abstraction
2. Inheritance
3. Encapsulation
4. Polymorphism

Question 7

..... refers to the act of representing essential features without including the background details.

1. Abstraction
2. Inheritance
3. Encapsulation
4. Polymorphism

Question 8

..... is the feature by means of which one class acquires the properties of another class.

1. Abstraction
2. Inheritance
3. Encapsulation
4. Polymorphism

Question 9

The ability of a function or object to take on multiple forms is called

1. Abstraction
2. Inheritance
3. Encapsulation
4. Polymorphism

Question 10

The term OOP stands for

1. Object Oriented Procedure
2. Object Oriented Packet
3. Object Oriented Programming
4. Object Orientation Procedure

Question 11

Java applications

1. Are platform dependent
2. Don't need a platform to run

3. Are platform independent
4. Can't run on Windows

Question 12

JVM stands for

1. Java Visual Monitor
2. Java Video Monitor
3. Java Virtual Monitor
4. Java Virtual Machine

Question 13

JRE stands for

1. Java Runtime Editor
2. Java Runtime Environment
3. Java Runtime Expression
4. Java Runtime Enabler

Question 14

Stand-alone Java applications for execution.

1. Need Java-compatible web browser
2. Need an assembler
3. Don't need Java-compatible web browser
4. Need a linker

Question 15

Java uses for execution.

1. Compiler and interpreter
2. Interpreter only
3. Compiler only
4. None of these

Question 16

A program that translates code written in a high-level language into machine code is called

1. Assembler
2. Linker
3. Compiler
4. None of these

Question 17

A program that translates an assembly language program into machine code is called a/an

1. Assembler
2. Linker
3. Compiler
4. None of these

Question 18

Java is

1. Robust
2. Object oriented
3. Secure
4. All of these

Question 19

Java can be used to write

1. Stand-alone applications only
2. Both stand-alone and internet applications
3. Internet applications only
4. None of these

Question 20

Java applications can run on

1. Windows platform
2. Macintosh platform
3. UNIX platform
4. All of these

Question 21

ASCII stands for

1. American Standard Code for Information Interchange
2. American Simulated Code for Information Interchange
3. American Standard Code for Interchange of Information
4. American Standard Code for Interaction of Information

Question 22

ASCII is

1. 6-bit set of codes
2. 8-bit set of codes
3. 7-bit set of codes

4. 16-bit set of codes

Question 23

Extended ASCII is

1. 6-bit set of codes
2. 8-bit set of codes
3. 7-bit set of codes
4. 16-bit set of codes

Question 24

Which of the following is not a token?

1. Keyword
2. Identifiers
3. Operators
4. Procedure

Question 25

Which of the following is a keyword?

1. character
2. break
3. object
4. attribute

Question 26

Which of the following is not a legal identifier?

1. _age
2. \$Amount
3. 9thClass
4. nullValue

Question 27

Which of the following is an invalid integer?

1. 1999
2. 1999999
3. 199 99
4. 199

Question 28

Which of the following is not a character literal?

1. '\t'
2. "t"
3. 't'
4. All of these

Question 29

Which of the following punctuator is the statement terminator in Java?

1. ;
2. .
3. ,
4. All of these

Question 30

Which of the following is not a primitive data type in Java?

1. boolean
2. short
3. float
4. class

Question 31

Which of the following is the size of a long data type in Java?

1. 32 bits
2. 64 bits
3. 48 bits
4. Long data type is not supported in Java.

Question 32

Which of the following is the size of a boolean data type in Java?

1. 1 bit
2. 16 bits
3. 8 bits
4. Boolean data type doesn't take any space in memory.

Question 33

An operator taking only single operand for its operation is called

1. A unary operator
2. A binary operator
3. A ternary operator

4. None of these

Question 34

Which one of the following is not a binary operator?

1. AND
2. %
3. ==
4. !

Question 35

Which one of the following is not a valid operator in Java?

1. <=
2. !==
3. !=
4. ==

Question 36

The statement $i = i + 1$ is equivalent to

1. $i++$
2. $i += 1$
3. $++i$
4. All of these

Question 37

For $x = 5$, the statement $sum = ++x + 8$ evaluates to

1. $sum = 13$
2. $sum = 14$
3. $sum = 15$
4. $sum = 16$

Question 38

The statement $(1 > 0) \&\& (1 < 0)$ evaluates to

1. 0
2. 1
3. false
4. true

Question 39

The statement $(1 > 0) \parallel (1 < 0)$ evaluates to

1. 0

2. 1
3. false
4. true

Question 40

The statement $(1==1)? 1: 0$ evaluates to

1. 0
2. 1
3. false
4. true

Question 41

The expression $13 \% 3$ gives the output

1. 4
2. 3
3. 2
4. 1

Question 42

The expression $13 / 3$ gives the output

1. 4
2. 3
3. 0
4. 1

Question 43

The statement `System.out.println("six " + 3 + 3);` gives the output

1. six 33
2. six 6
3. 33 six
4. 6 six

Question 44

The expression $4 + 8 \% 2$ gives the output

1. 6
2. 8
3. 4
4. None of these

Question 45

Which Java package includes the Math class?

1. java.io
2. java.lang
3. java.util
4. java.sys

Question 46

Give the output of Math.sqrt(x); when x = 9.0

1. 3
2. 3.0
3. 3.00
4. All of these

Question 47

Give the output of Math.ceil(46.6).

1. 46.6
2. 46.5
3. 47.0
4. 46.0

Question 48

Give the output of Math.abs(x); when x = -9.99

1. -9.99
2. 9.99
3. 0.99
4. None of these

Question 49

Which of the following is a method to find the square root of a number?

1. FindSquareroot(x)
2. Sqrt(x)
3. Math.Square(x)
4. Math.sqrt(x)

Question 50

What will be the output of Math.pow(2, 0)?

1. 0.0
2. 1.0
3. 2.0

4. -1.0

Question 51

Math.random() returns a double value r such that

1. $0.0 \leq r < 1.0$
2. $0.0 \leq r \leq 1.0$
3. $0.0 < r \leq 1.0$
4. $0.0 < r < 1.0$

Question 52

Give the output of Math.floor(46.6)?

1. 46.5
2. 47.0
3. -46.0
4. 46.0

Question 53

Which operator cannot be used with if-else statement?

1. $\leq$
2. $\parallel$
3. $\&\&$
4. $?:$

Question 54

Predict the output of the following code snippet:

```
int a = 1;
int b = 2;
if (a == b)
    System.out.println ("Both values are equal");
else
    System.out.println ("Values are not equal");
```

1. Both values are equal
2. Incorrect use of the == operator
3. Values are not equal
4. No output

Question 55

Consider the following code snippet:

```
if ( c > d)
    x = c;
else
    x = d;
```

Choose the correct option if the code mentioned above is rewritten using the ternary operator:

1. `x = (c > d) ? c : d;`
2. `x = (c > d) ? d : c;`
3. `x = (c > d) ? c : c;`
4. `x = (c > d) ? d : d;`

Question 56

if `((a > b) && (a > c))`, then which of the following statements is true?

1. a is the largest number.
2. b is the largest number.
3. c is the largest number.
4. b is the smallest number.

Question 57

Consider the following code snippet:

```
int val = 2;
switch (val)
{
    case 1: System.out.println("Case 1");
    break;
    case 2: System.out.println("Case 2");
    break;
    default: System.out.println("No match found");
    break;
}
```

Which of the following statements is correct?

1. case 1 will be executed.
2. case 2 will be executed.
3. default will be executed.
4. both case 1 and 2 will be executed.

Question 58

A sequence of statements enclosed between a pair of curly brackets is called

1. a compound statement
2. an empty statement
3. a null statement
4. a void statement

Question 59

Which clause is optional in the switch statement?

1. default
2. case

3. switch
4. None of these

Question 60

Which of the following statements involves a fall-through?

1. if-else
2. for loop
3. if-else-if ladder
4. switch

Question 61

Which of the following causes a fall-through in the switch statement?

1. the omission of fall
2. the omission of continue
3. the omission of break
4. the omission of loop

Question 62

Which of the following is mandatory in the switch statement?

1. break
2. continue
3. case
4. default

Question 63

A method that does not return a value has a return type.

1. boolean
2. class
3. int
4. void

Question 64

A method can return

1. Any number of values
2. 2 values
3. Only 1 value
4. 3 values

Question 65

If a method returns a value, then it must be

1. The same data type as defined in its prototype
2. void type
3. int type
4. boolean type

Question 66

Parameters in the method definition are called

1. Formal parameters
2. Actual parameters
3. Informal parameters
4. void parameters

Question 67

The parameters that are passed to the method when it is invoked are called

1. Formal parameters
2. Actual parameters
3. Informal parameters
4. void parameters

Question 68

The scope of a local variable is limited to the

1. Windows
2. Multiple programs
3. Class
4. Method or block it is declared in

Question 69

The function which changes the state of an object is known as:

1. pure function
2. impure function
3. replace function
4. none of the above

Question 70

Parameters used in function call statement are known as:

1. defined parameter
2. passed parameter
3. actual parameter
4. formal parameter

Question 73

Parameters used in the function definition are called:

1. forward parameter
2. actual parameter
3. formal parameter
4. none of the above

Question 74

The process of calling a function in such a way that the change in the formal arguments reflects on the actual parameter is known as:

1. call by reference
2. call by value
3. call by method
4. none

Question 75

A function with many definitions is called:

1. multiple function
2. function overloading
3. floating function
4. none

Question 76

A function may be associated with:

1. return
2. call
3. promote
4. none

Question 77

Which of the following type can be used for a non-returnable function?

1. int
2. float
3. double
4. void

Question 78

A function body is enclosed within a pair of:

1. { }
2. []
3. ()
4. under a rectangular box

Question 79

A function is invoked through an:

1. object
2. system
3. parameter
4. none

Question 80

An Example Of Polymorphism is.....

1. Overriding
2. Overloading
3. Data Hiding
4. Making Arguments
