

for loop syntax:

```
for(initialization; condition, update-statement){  
    //code  
}
```

```
for(int i=1; i<=10; i++){  
    System.out.println(i);  
}
```

while loop syntax:

```
initialization;  
while(condition){  
    //code  
  
    update statement;  
}
```

```
int i=1;  
while(i<=10){  
    System.out.println(i);  
    i++;  
}
```

do-while syntax:

```
initialization;  
do{  
    //code  
  
    update-statement;  
  
}while(condition);
```

```
int i=1;  
do{  
    System.out.println(i);  
    i++;  
  
}while(i<=10);
```
