

Q1.

Define a class **ElectricBill** with the following specifications:

[15]

class : ElectricBill

Instance variables / data member:

String n – to store the name of the customer

int units – to store the number of units consumed

double bill – to store the amount to be paid

Member methods:

void accept() – to accept the name of the customer and number of units consumed

void calculate() – to calculate the bill as per the following tariff:

<u>Number of units</u>	<u>Rate per unit</u>
------------------------	----------------------

First 100 units	Rs.2.00
-----------------	---------

Next 200 units	Rs.3.00
----------------	---------

Above 300 units	Rs.5.00
-----------------	---------

A surcharge of 2.5% charged if the number of units consumed is above 300 units.

void print () - To print the details as follows:

Name of the customer:

Number of units consumed:

Bill amount:

Write a main method to create an object of the class and call the above member methods.

Q2. Write a menu driven program to find area of circle or area of square or area of rectangle after taking necessary inputs from user.

Q3. Using the switch statement in Java, write a program to display the colour of the spectrum (VIBGYOR) according to the user's choice.

Q4.

Employees at Arkenstone Consulting earn the basic hourly wage of Rs.500. In addition to this, they also receive a commission on the sales they generate while tending the counter. The commission given to them is calculated according to the following table:

Total Sales	Commision Rate
Rs. 100 to less than Rs. 1000	1%
Rs. 1000 to less than Rs. 10000	2%
Rs. 10000 to less than Rs. 25000	3%
Rs. 25000 and above	3.5%

Write a program in Java that inputs the number of hours worked and the total sales. Compute the wages of the employees.
