

Theory

1. Write Prototype of a function that takes a floating point number and returns a character
2. What is a function ?
3. What is function overloading ?
4. what are formal and actual parameters ?
5. what are local, class and instance variables ?
6. why do you understand by the following terms : static and non static
7. What is access specifier ? what are the types of it ?
8. what is return type?
9. classify constructors.
10. what is method signature
11. distinguish between call by value and call by reference.
12. Explain the use of 'this' keyword.
13. what are data members?
14. what is constructor overloading?
15. what is copy constructor ?
16. why do we use constructor?
17. what are pure and impure functions ?
18. what are objects ?
19. what is initialization ?
20. what is instantiation ?
21. Write the syntax for creating objects.
22. Which are the data types that can be used for choice variable of switch-case
23. what are jump statements ?
24. Write the use of System.exit(0)
25. What is array?
26. what is the use of 'new' keyword ?
27. Write the reason for ArrayIndexOutOfBoundsException
28. What is the purpose of length property in array?
29. define the functions trim() , charAt() and length()
30. distinguish between length and length()
31. Can we compare two string using == ?
32. What is scope of a variable ?
33. What is dimension of an array ?
34. What are unboxing and autoboxing ?
